**Subject:** RE: Techlaw help w/compiling Parcel C & E evaluations?

I should have some time later this week, once I finish QCing Jana's E forms.

No particular target for C. Just there's not that many documents to review right now for hunters point, and a lot of the Technical intense heavy lifting is already done, so the end is just some compilation cutting and pasting. So I thought maybe we should take advantage of this relatively light load Before the workplan comes October 17.

Hi Lily,

Yes, we can help with this. What is your target for sending out the Parcel C information?

Jana and I are working to get Parcel E to you this week. Have you received the finalized E forms (building survey units) that I QC'd for Tracy in July? (We will need to compile all of the E forms, I think).

Dear Karla,

I had put on hold Parcel C and E official communication to Navy, since it was not urgent. But since I will be leaving this job, I wanted to talk to you about ask Techlaw to do the compiling of the information in those parcels format similar to attached version already sent. Let's talk about timing.
